Borland®

Borland[®] Delphi[™] 7 features

	Studio Architect	Studio Enterprise	Studio Professional	Personal Edition
New Microsoft [®] .NET interoperability and migration	support			
New Delphi compiler warnings and hints for .NET compatibility	 ✓ 	v	~	~
New Import any .NET assembly as a COM object	v	v	~	~
New Export COM objects in Delphi to .NET managed applications	 ✓ 	v	v	~
New Delphi™ for .NET prerelease preview				
New .NET preview CIL compiler for the Delphi [™] language to create managed applications	v	v	~	~
New .NET migration documentation	v	✓	✓	v
New ModelMaker technology				
New Model-driven design	 ✓ 	v		
New UML [™] -based visual modeling and refactoring (tool)	~	v		
New Native Delphi integration, reverse engineering, and instant visualization	~	v		
New Apply off-the-shelf design patterns	v	v		
New AtoZed IntraWeb software technology				
New Deploy your application to the Internet, utilizing drag-and-drop visual Web application development	V	v	v	
New Add interactive content to your Web sites by rapidly and visually building dynamic server-side HTML Web applications	~	~	~	
New Transparently manages Web application details such as cookie, session, and user management	~	v		
New Create, debug and maintain Web-based applications (Weblications) quickly with Application Mode	V	~		
New Support for easy-to-use API for implementing custom components	v	v		

Delphi

Borland® Delphi™ 7 features	Architect	Enterprise	Professional	Persona
	memteet	Litterprise	1101035101101	1 cisoin
New Nevrona Rave [™] technology				
New Powerful Rave Reports Borland Edition visual report designer and code-based API	~	v	 ✓ 	
New PDF, HTML, RTF, and text rendering formats	v	v	~	
New Native native support for VCL and Borland Component Library for				
Cross-platform (CLX ^m) applications	~	v	~	
New Flexible page-based layout to handle both form and banded style reports	~	~	~	
New Bold® for Delphi™ from BoldSoft				
New Maintain less code with a true MDA	v			
New UML technology. Full support for class diagrams, tagged values, stereotypes,				
associations (aggregates, compositions), cardinality, visibility, mixed transient/persistent	,			
elements, mixed transient/persistent classes	~			
New Integrated support for Rational Rose [®] and ModelMaker—import/export model information from/to Bold [®] Model Editor	~			
New Automatic database schema generation using SQL	~			
New Windows XP [™] themes				
New Enable applications to take part of Windows XP [™] themes with a look that will				
blend in with your favorite Windows XP theme	~	V	V	V
New Take full advantage of the new XP look for the Windows [®] common controls library (comctrls.dll version 6.0)	~	~	~	~
New ThemeServices wrap around theme APIs to enable an application or control	•	•	•	•
to use theme functions transparently	~	~	~	V
BizSnap [™] —Web Services with XML technologies				
New UDDI browser to visually locate and import registered Web Services	~	v	~	
New Automatic UDDI client failover support	v	v	 ✓ 	
New Global XML Architecture (GXA) for Web Services, header support for				
Web Services routing, and Web Services Inspection Language (WSIL)	V	V	 	
New Binary attachments	~	<i>v</i>	V	
New for Pro Rapidly build server-side W3C-compliant Web Services using				
SOAP, XML, WSDL, and more Rapidly build client-side applications that consume W3C-compliant Web Services	~	~	V	
using SOAP, XML, WSDL, and more	~	~	~	
New for Pro WSDL wizards and components mean you can easily access Internet Web Services	•	•	•	
and add functionality to your own applications	~	~	~	
New for Pro Create applications that seamlessly inter-operate across the Internet with				
standards-based Web Services platforms such as Microsoft® .NET, Sun® ONE, and others!	~	~	~	
New for Pro SOAP communication wizards and components make building Web Services a snap!	 ✓ 	 ✓ 	v	
New for Pro Delphi native SOAP bindings deliver type and syntax checking with CodeInsight [™]			_	
and more with SOAP Web Services	V	V	~	
XML Transform Components (XML<->dataset, XML<->XML) enable your application to translate XML data between XML and dataset formats easily	~	~		
XML Schema transform tools and utilities provide translation between XML data, DTDs,	•	•		
and XDR schema and datasets automatically, making XML Schema analysis, creation, and				
XML data transformations a snap!	~	~		
Native Delphi XML bindings radically simplify XML programming—				
XML documents become native Delphi objects	~	~		
Avoid vendor lock-in and incorporate data from virtually any XML source with				
multiple XML DOM Level 2 support	<u> </u>	V		
VMI doe object in the VCI merides for an	N	~		
XML doc object in the VCL provides fast programmatic access to new XML formats XML Document Objects and native Web Services WSDL bindings leverage CodeInsight		•		

9 Borland® Delphi™ 7 features	Architect	Enterprise	Professional	Persona
	Artifitett	Enterprise	FTUIESSIUIIdi	reisona
WebSnap [™] —the complete Web application design platfo	orm			
Deploy your Web applications to Microsoft IIS, Netscape, [®] and New Apache [™] 2.0!				
With support for ISAPI, NSAPI, Apache DSO, and CGI	~	~		
WebPage Surface Designers to rapidly build and view your WebSnap™ application surfaces in				
HTML and an instantly updated browser preview of your application	 	 ✓ 		
XML Tree and XSL Tree displays to present any XML and XSL documents with				
easy-to-read indentations and syntax highlighting Enhanced Server-side scriptable Web page components to easily interface WebSnap/NetCLX [™]	~	<i>v</i>		
objects with Web site development teams and scripters	~	~		
Pre-built scriptable Web page components—datasets, login forms, end-user sessions,	•	-		
and other commonly required Web application elements	~	✓		
Page Producers and Dispatchers for servicing standard and XSL-transformed XML pages,				
logical pages, and your own custom adapters and services	~	~		
Multiple Web modules in a single project to organize your pages and your site	~	~		
XSL Page Producers for combining XML source data with XSL transforms to produce				
full-page outputs to HTML	~	V		
Enhanced Server-side scripting in WebSnap with JavaScript,® and VBScript	V	V		
Active script debugging support in WebSnap	~	\checkmark		
InternetExpress [™]				
XML Web browser tables for high-performance client-cached XML Web Database Tables	~	v		
XML data from DataSnap [™] Servers to simplify data exchange	~	~		
XML broker for quickly providing XML data for Web server applications	~	~		
DataSnap PageProducer wizard to migrate your applications to the Internet with XML and				
HTML 4 for dynamic Web clients	~	~		
Web Page Editor for instantly designing HTML 4 Web documents that deliver dynamic XML data	· 🖌	~		
NetCLX [™] WebBroker [™] —compatible, cross-platform Web application				
development framework for Windows [®] and Linux [®]				
Develop single-source applications for deployment to Web servers on Windows and Linux® *	V		~	
Automated Web Debug Server accelerates your Web application testing cycles	~	 ✓ 	V	
NetCLX [®] Web application framework for high-speed, high-throughput, cross-platform		~	~	
Web applications compatible with WebBroker [™] NetCLX Web application components for cross-platform development on Apache, IIS, Netscape,	~	V	V	
and more, using ISAPI, NSAPI, Apache DLL and SO extensions, or CGI	~	~	V	
WebModules [™] for centralized information publishing to Internet applications	~			
Web application wizard gets you up and running quickly	~	~		
WebDispatcher [™] component for issuing rapid responses to browser requests and adapting	•	•	•	
any DataModule to the Web	~	~	~	
New Apache 2.0 Web Server support in Delphi Web technologies	v	v	~	
Seamless Internet/intranet wizards and components				
WebBridge for an open solution that supports ISAPI, NSAPI, Apache DLL, and CGI	 ✓ 	 ✓ 	V	
Page preview with HTML 4 support	~	 	V V	
Web deployment wizard for deploying thin-client, zero-configuration applications using the Web	~	 	V	
Web application wizards make getting started on Web development a breeze	~	 	V	
Exclusive: ActiveForms [™] for building rich GUI forms for Win32 [®] client applications and browser	•	 	V	
LOWSEL AND A DURING AND ADDRESS AND ADDRESS AND ADDRESS ADDRES	s V V	 	V	
	•	*	•	
Internet socket components to customize your own networked applications				
Internet socket components to customize your own networked applications Borland® Database Engine (BDE) CAB file for easy distribution of database applications	~	v	V	
Internet socket components to customize your own networked applications	~ ~	 ✓ ✓ 	V	

	Architect	Enterprise	Professional	Person
DataSnap [™] Web Services-enabled database middleware				
New Royalty-free distribution with unlimited licenses	~	V		
Web Client, GUI Client, and Web Services access to any supported RDBMS	~	 ✓ 		
SOAP/XML, COM, Web, and TCP/IP access connections available for maximum network connectivity and flexibility	~	~		
Easily build XML/SOAP Web Services interfaces to any enterprise-class database— Oracle, [®] Microsoft SQL Server, [™] IBM [®] DB2, [®] Borland InterBase, [®] and more!	~	~		
Dataset-based architecture for rapid learning curve—use existing skill sets to scale your applications	v	v		
Support for dbGo, [™] BDE, IBX, and dbExpress [™] data access architectures	v	v		
High availability with object broker fail-over safety to guarantee your data is ready when you need in	t 🖌	~		
Load balancing to promote the highest performance even when under the heaviest loads	v	~		
Distributed data with transaction processing extends the reach of your applications while maintaining data integrity	~	~		
Automatic database constraint propagation brings the business rules to the client applications				
for local processing, conserving server horsepower	<u> </u>	V		
Low-maintenance, thin, and easily-configured client-side applications to reduce deployment costs	<u> </u>	V		
High-speed database connectivity yields higher performance in your applications	~	V		
Server object pooling maximizes the conservation of resources on your servers, keeping material costs down	~	~		
Supply data to thin-client applications rapidly, efficiently, and securely	~	V		
Remote data broker to more easily partition applications	~	~		
TransactionResolver for transaction conflict resolution	~	~		
Exclusive: Advanced Master/Detail Provider and Resolver support	~	~		
BDE Resource Dispenser for Microsoft Transaction Server	~	~		
Stateless DataBroker for more control in mobile and low-bandwidth situations	~	~		
Server object pooling for complete scalability	~	~		
Provider options increase control over how and what information is transmitted	~	~		
DataSnap Development License included	~	~		
Simple DataSnap deployment licensing	\checkmark	\checkmark		
CORBA® support				
New VisiBroker® 4.5 for Delphi 7 including CORBA® client and server development	v	~		
Wizards to simplify development of CORBA clients and servers	v	~		
Borland® Enterprise Server, AppServer [™] Edition SIDL support—build new rich applications and Web Services with the Delphi RAD environment that uses EJB [™] for AppServer	~	~		
Support for simultaneous COM and CORBA objects	~	v		
High-performance native Windows® applications				
High-performance 32-bit optimizing native-code compiler	~	v	~	~
Easily create reusable dynamically linked libraries (.DLL), COM controls (.OCX), and stand-alone executables	~	V	~	~
Use and create dynamically loaded packages for maximum application efficiency	· ·			~
Inline assembler with support for full Intel [®] 32-bit x86 instruction set (including Pentium [®] Pro, Pentium III, Pentium 4, MMX, [®] SIMD, and Streaming SIMD Extensions (SSE and SSE2),	-			•
and AMD° 3DNow! TM	~	~	~	~
Expression evaluation in compiler directives	~	V	~	V
Custom variants to support your own data types	V	V	· · · · · · · · · · · · · · · · · · ·	V
Custom variant data handler for passing variants through data sets	V	V	×	· ·
Custom variant in safe arrays	· ·	· · ·	v	· ·
Expanded variant support for Int64 and the unsigned types	~	<hr/>	v	V
Complex number support via custom variants	V	V	×	· ·
Deprecated Hint Directive to help improve your application development	~	· ·		· ·
Platform and Library Hint Directives to assist in cross-platform development	· ·		· · ·	~

	Architect	Enterprise	Professional	Person
Borland® Rapid Application Development (RAD) IDE				
State-of-the-art IDE with a fully integrated Code Editor and debugger, view history,				
easy-to-understand error messages, and color syntax highlighting	v	 ✓ 	V	~
New Code completion for DTD described markup language including HTML, WML, XHTML, XSL	~	~	~	
New Message helper that hooks error messages to documentation	· ·		~	~
New Toggle visible symbols in editor that represent use of whitespace as tabs or spaces	~		~	~
New Syntax highlighting OpenTools API extension with built in support	•	•	•	•
for JavaScript, PHP, and INI files	~	✓	~	
Enhanced Ability to individually customize editor options for particular file types.	v	v	~	~
New OpenTools API for code completion and symbol table queries	v	v	~	
Enhanced Component palette layout for quicker navigation	v	v	V	~
Fully customizable IDE layout with window docking and floating toolbars	v	v	v	v
Multiple custom Desktop Layout Profiles for total control of your development environment	v	v	v	~
Object TreeView for quick navigation and manipulation of the objects in the current designer	~	v	~	~
Object Inspector [™] Subcomponent References to save time locating linked components—				
directly drill-down into subcomponents	<i>V</i>		V	~
Class Completion accelerates creating new object types	V	<u> </u>	V	<u> </u>
Packages in project manager	<u> </u>	<u> </u>	V	
RTL package for non-visual development	V	 ✓ 	V	V
Context-sensitive component palette displays only components that can be placed on the currently active forms or data modules	~	~	~	~
Environment Variables in search path to enable automatic location of required files	~			
Advanced Multi-target Project Manager	· · ·			· ·
Data modules for centralized data integrity and business rules	V	· ·	V	~
Console Application Wizard for quickly writing text-mode applications	V	V	V	~
RC Files integrated with the project manager and compiler	v	v	~	~
Both VCL and CLX [™] Visual Form Inheritance and Form Linking	v	v	~	~
Editor Key mapping to fine-tune the editor to the way you work	v	v	~	
Project-wide browsing to better understand your code and to navigate the VCL	v	v	~	
Data Module Designer with Tree View and Data Diagram View to gain a comprehensive				
understanding of the data in your application	~	v	~	
Control Panel Wizard makes building control applets fast and simple	~	V	~	
To-Do lists to keep your development on schedule	~	v	~	
OpenTools API to integrate your favorite tools	 ✓ 	V	~	
AppBrowser [™] code editor with symbol hyperlinks and navigation history	~	\checkmark	~	
Maximum reusability with Delphi [™] object-oriented architecture				
Object-oriented, fully extensible component and application architecture in both VCL and CLX	v	~	~	~
Support for Windows common controls	v	v	~	~
VCL and CLX Visual Form Inheritance and Form Linking to reduce coding				
and simplify maintenance	V	V	V	~
Object Repository for storing and reusing forms, DataModules, and experts	v	V	V	~
Visual Component Library of drag-and-drop reusable components	v	v	v	~
Component Library for Cross-platform of drag-and-drop reusable components for Windows and Linux*	~	~	~	
Code Explorer for an instantly updated class reference for your application's unit files

RADical visual development

Visual Component Library (VCL)				
VCL native components for Rapid Application Development	300+	300+	225+	85+
New Windows XP theme support to modernize the look of your applications	~	~	~	~
Windows 2000-style Shell Control examples to modernize your interface	~	~	~	~
Component Interface Reference architecture to surface Component Interfaces in the Object Inspector	r 🖌	~	~	~
TdateTime extensions accelerate your date and time calculations	~	~	~	~
SubComponent classes combine commonly mixed components for greater utility,				
and they speed the creation of user interfaces	~	~	~	<i>v</i>
Conversion Unit simplifies measurement conversions	~	~	v	~
Visual Component creation	~	~	~	~
Package Manager to easily control the contents of custom component packages	~	~	~	~
Modern UI features: Docking, Intellimouse® support, Minimum and Maximum				
Component Sizing Constraints, and border anchors in visual components	~	~	~	~
Action List for managing and directing commonly used code in an application	~	~	~	~
Windows 98/Me/2000 support for Multi-Monitor, MonthCalendar, PageScroller, and Flat Scrollbars	~	~	~	v
Owner Draw support in the Property Editors for simplifying display of property choices	v	~	~	v
Support for Advanced Custom Draw functions for increased control over the Windows API	v	~	~	v
Action MainMenu and Action ToolBar components for sophisticated and centrally controlled User Interface design with dynamic Action Manager-driven UI surfaces	~	~	~	
Action Manager provides central management of your actions and self-configuring dynamic User Interfaces, taking the tedium out of UI design	~	V	~	
ActionBands™ Customization Manager gives your end-users total control over ActionBands UI configurations at runtime!	~	~	~	
Windows NT [®] service applications	v	~	~	
Package Collection Editor	~	~	~	
ControlBar for creating floating toolbars in GUI applications	~	~	v	
Frames for building and reusing compound components	~	v	v	
Web Browser component for integrating HTML browsing into your application	~	v	v	
Set of Microsoft Office automation components to quickly integrate your applications with Office applications such as Word, Excel, and Outlook®	~	V	~	

	Architect	Enterprise	Professional	Persona
CLX [™] (Component Library for Cross-platform) development on Windows [®] /Linux [®] *				
More than 160 CLX native components for Rapid Application Development				
on Windows and Linux*	~	~	~	
BaseCLX [™] RTL classes and components	v	~	v	
VisualCLX [™] native GUI components and data-aware visual controls	v	~	v	
VisualCLX GUI display components—Form, EditBox, Label, Grids, Image, Bevels, Listbox, ComboBox, ListView, TreeView, ProgressBar, and more	v	v	~	
VisualCLX GUI DataAware components—Navigator, EditBox, Label, Grids, Image, Listboxes, Checkbox, RadioGroup, LookupLists, and more	~	v	~	
VisualCLX GUI input components-Menus, PopupMenus, Buttons, Checkboxes, RadioButtons,				
SpeedButtons, SystemTimer, Sliders, and more	V	~	~	
VisualCLX GUI control components—Toolbars, Scrollbars, Controlbars, Splitters, GroupBoxes,				
TabControls, PageControls, StatusBars, and more	<u> </u>	<u> </u>	<u> </u>	
Common CLX GUI dialogs—Open, Save, Font, ColorPicker, Find, and Replace	 			
DataCLX [™] highly scalable data-access components	~	V	~	
Borland [®] Kylix [™] 3 IDE for the Delphi [™] language

Master/Detail Provider and Resolver support	v	~	v
On-demand Blobs	v	~	v
MyBase [™] XML Data Briefcases for transparent mobile and low-bandwidth connectivity support	~	~	 Image: A start of the start of
CommandText property for building custom queries at client side	v	v	v
Broad range of data-access options—get access to data your application needs			
dbExpress for ultra high-performance native SQL RDBMS access	~	~	v
Borland Database Engine (BDE) 5.1.1	~	~	V
InterBase Express [™] (IBX) for Direct-API access to InterBase	~	~	v
All Delphi data-access options use common DataSet/DataCLX Programming Model—			
use any data-access method with one skill set	~	~	\checkmark
dbGo for ADO 2.5 direct access to any ADO-compliant dataset, from office applications to RDBMS	~	~	V

Borland® Delphi [™] 7 features				
	Architect	Enterprise	Professional	Persona
Open database architecture—connect to all your data				
Access, FoxPro,® Paradox,® and dBase® drivers for high-speed access to desktop				
and LAN database systems	~	 ✓ 	~	
Complete ODBC connectivity	~	 ✓ 	~	
BDE API for direct open access to any database engine	~	 ✓ 	~	
Support for autorefresh	~	 ✓ 	~	
TCustomConnection class to easily integrate third-party database solutions	~	 ✓ 	~	
SQL links native drivers with unlimited deployment license for InterBase, Oracle, Sybase,® Informix,® Microsoft SQL Server, and DB2	~	~		
Integrated database development tools—simplify client/server development				
New TSimpleDataSet to simplify use of dbExpress drivers	~	v	~	
New ClientDataSet actions to simplify synchronization of database actions with user interfaces	~	v	 ✓ 	
Data-aware components to build powerful database applications	~	v	 ✓ 	
DB Control Grid	v	v	v	
Cached updates for increased server responsiveness	v	v	~	
Database desktop for creating and managing Paradox and dBase tables	v	v	~	
Database Explorer to visually browse and manage tables, aliases, and indices	v	v	~	
Scalable Data Dictionary to maintain data integrity	v	v	v	
DBGrid support for Nested Tables, ADTs, Array and Reference fields	v	v		
SQL Database Explorer to visually manage server-specific meta-data, including stored procedures and triggers	~	~		
SQL Monitor to test, debug, and tune SQL applications for optimal performance	v	v		
SQL Builder for writing complex SQL easily	~	v		
Data Migration Wizard for rapid upsizing and application scaling	~	v		
dbExpress [™] native cross-platform database connectivity—access all your data at extrem	me speed			
Multiple transactions on a single connection	~	v	~	
dbExpress high-performance database driver interface for open access to any database engine	~	v	~	
Single-file distribution of dbExpress applications!	v	v	~	
High-performance database drivers				
New dbExpress driver for MS SQL 2000	~	v		
dbExpress drivers for InterBase, MySQL™	~	v	V	
BDE local drivers for Paradox, dBase, FoxPro, Access	~	v	V	
dbExpress drivers for Oracle, DB2, and Informix	~	v		
BDE SQL links for Oracle, Microsoft SQL Server, IBM DB2, Informix, Sybase, and InterBase **	v	v		
MyBase [™] personal XML database engine				
Database Engine-in-a-component design for lightweight single-file application distribution	v	~	v	
XML file database for complete simplicity and inter-operability	v	v	~	
Fast In-memory table performance	v	v	~	
Zero configuration for instant setup and simple application distribution	v	v	v	
Small footprint—less than 300k linked in executable or 0k with shared packages	v	v	~	
ANSI 92 SQL Expression Syntax for live filtering and aggregation	v	v	~	
Linkable master/detail table relationships	v	v	~	
ClientDataSet based with transparent scalability to dbExpress and DataSnap for unlimited scalabilit	y 🖌	V	V	
Import SQL query results from any dbExpress RDBMS into local MyBase XML tables	<i>.</i>	V	V	
Support for all popular data types including Blobs	V	V	<i>v</i>	
······································	-	-	-	

	Architect	Enterprise	Professional	Persona
Advanced Borland [®] InterBase [®] support				
InterBase 6.5 support including InterBase Express native API components	v	v	~	
InterBase 6.5 five-user development license to build and test multi-user SQL applications	~	~	~	
Documentation, examples, and online help				
Comprehensive online documentation for quick reference	v	~	~	v
Printed developer documentation for offline consulting	v	~	v	~
Sample applications to learn from and get started quickly	v	✓	v	~
COM/ActiveX [®] /COM+ features				
Automatic COM+ object setup with configuration attributes for simplified COM+ object deployn	nent 🖌	~	v	
Event object wizards speed linking to COM+ events and VCL support for COM+ event registration				
Transaction objects take advantage of the latest transaction control services in Windows				
Dual MTS/COM+ support for transaction objects	· ·			
Transaction datamodule for internal segregation of COM+ object elements	· ·		•	
	•	•		
ActiveInsight [™] —an enterprise component foundry for maximum reusability				
Active document support	v	~	~	~
COM/interfaces for language inter-operability	V	~	~	~
Full Win95/Win98/Me/NT/2000 support for OLE Automation Controllers and Servers	v	~	~	~
Runtime component packages for easily updated, small application executables	v	~	~	~
Visual component creation for instantly creating component templates	~	~	~	~
One-step ActiveForms to deliver applications over the Web	~	~	~	
ActiveX*				
One-step industry-standard ActiveX® components for maximum reusability	v	~	v	
Advanced Type Library Editor with complete support for MS IDL editing	v	~	~	
Support for Automation Object event handling	v	v	~	
COM Object Wizard	v	v	~	
ActiveX [®] Control Data binding	v	v	~	
Support for sparse vtables to support VB servers	v	~	~	
Import COM servers as components to develop visually	v	v	~	
Third-party component solutions Nevrona INDY—Internet Protocol Component Suite including HTTP, FTP, SMTP, POP3, and n		V	V	
"Delphi Companion Tools" CD includes numerous third-party components and tools		 	 	
TeeCharts		* ./
